

Geothermal System Purchase and Installation – Grant Application Guide and Form

For residential customers

Conditions for Eligibility

New homes (new construction)

- The house must be located in Québec.
- The geothermal system must have been installed after May 1, 2007. Both the installation and the contractor must be **certified** by the Canadian GeoExchange Coalition.

Existing homes

- The house must be located in Québec.
- You must be a participant in the Rénoclimat program of Québec's Agence de l'efficacité énergétique.
- The main heating system must have been electric for at least one year at the time the work to be done was evaluated under the **Rénoclimat** program.
- The geothermal system must have been installed after May 1, 2007. The contractor must be accredited, and the installation **certified**, by the Canadian GeoExchange Coalition.

How to Apply

You will need the following:

- Your Rénoclimat file number (for existing homes)
- Your Canadian GeoExchange Coalition certificate

For information on how to obtain your certificate, visit the Web site of the Canadian GeoExchange Coalition at www.geo-exchange.ca.

Complete all three sections of the form:

- Section 1 – General Information
- Section 2 – Installation Information
- Section 3 – Grant Amount and Customer Agreement

Please send your grant application form and a copy of the Canadian GeoExchange Coalition certificate to Hydro-Québec.

Fax:

1 514 879-4807

Mail:

Residential Geothermal Systems Grant Program
Hydro-Québec
2, Complexe Desjardins
Tour Est, 26^e étage
Case postale 10 000, succ. Place Desjardins
Montréal (Québec)
H5B 1H7

NOTE: Please be sure to send us your duly completed form and a copy of the certificate; otherwise, your application will not be processed.

Processing time

If your application is in order, you will receive your grant within 30 days of the date Hydro-Québec received your application.

Terms and Conditions

Eligibility

The house must be located in Québec and must meet the criteria listed on the previous page.

Applicable warranties

The warranties applicable to the installed system (against manufacturing defects affecting safety, system performance, etc.) are those of the manufacturer. Hydro-Québec cannot be held liable for any damage or injury resulting from the installation or use of the system covered by the grant application.

Inspection

The applicant agrees unconditionally to provide the relevant documents or to have the geothermal system inspected within six months after reception of the grant application form by Hydro-Québec.

Any applicant who fails to meet these conditions will have to reimburse the grant.

Failure to pay Hydro-Québec

Hydro-Québec may, at any time, deduct any amount owed to it by the applicant, including overdue bills or a deposit requested and not received, from any grant payable under this program.

Supporting documents

A copy of the Canadian GeoExchange Coalition certificate must be submitted.

Changes to terms and conditions

Hydro-Québec reserves the right to change the Program terms and conditions without notice. However, applications supported by invoices dated before the changes came into effect will still be considered.

Installation standards

The applicant is responsible for selecting, purchasing and installing the equipment. All installations must comply with existing standards. Hydro-Québec recommends using the services of a qualified contractor who will install your equipment in accordance with the *Building Act* and the manufacturer's recommendations.

Restriction

Any system that has received a geothermal systems grant from Hydro-Québec cannot receive any other rebate or financial assistance from another Hydro-Québec ENERGY WISE program, unless otherwise indicated.

Environment

The applicant is responsible for recycling or disposing of any equipment or material replaced under this program.
